

NANDAGOPAL D

Bangalore, KAR, IN | +91-9591284895 | Nandugopaldevraj.2702@gmail.com | [LinkedIn](#) | [GitHub](#)

Profile:

Software Engineer - Frontend with 4 years of experience building scalable, high-performance web applications using React.js and JavaScript. Proven track record of delivering zero-defect releases and optimizing UI performance by 25% in enterprise environments.

EDUCATION:

Bachelor of Engineering

Dayananda Sagar College of Engineering

[May 2021 -Bangalore,IN]

SKILLS:

Languages & Frameworks: JavaScript (ES6+), React.js, Redux, HTML5, CSS3, TailwindCSS, Node.js, Python

Tools & Platforms: Jest, React Testing Library, Git, GitHub, Vite, Jira, VS Code, Netlify, Vercel.

Backend & Database: RESTful APIs, JSON, Appwrite (BaaS), PostgreSQL, MySQL.

Engineering practise: CI/CD, Performance Optimization, Responsive Design, Debugging,Analytical Skills

Core Foundations: Data Structures, Object-Oriented Programming, Machine Coding, UI Design Patterns

WORK EXPERIENCE:

Aziro Technologies:

Software Engineer - Frontend

[Bangalore, Karnataka, India] [June 2022 - Present]

- Delivered **10+ client-facing production releases** with zero critical post-deployment bugs, collaborating with QA teams.
- Resolved **50+ frontend defects** (UI) in Jira, improving application stability for enterprise projects.
- Led end-to-end development of **20+ user stories** in Agile sprints, achieving **95% on-time delivery** for client milestones.
- Optimized React component rendering using memoization and lazy loading, reducing page load time by **25%**.
- Integrated **RESTful APIs** with Axios, implementing error handling and data validation for seamless user workflows.
- Conducted **cross-browser testing** (Chrome, Firefox, Safari), resolving compatibility issues and improving UX consistency.
- Mentored 2 junior developers on React best practices and debugging techniques, reducing onboarding time by 30% and improving code quality consistency.
- Served as **Resource Lead** for multiple releases, coordinating frontend deliverables and ensuring alignment with sprint and release timelines.
- Worked across **multiple environments (development, staging, production)**, validating frontend behavior under different configurations and ensuring smooth promotion of releases.
- Resolved production **UI issues by analyzing logs**, reproducing edge cases, and **collaborating with backend teams** to identify root causes, preventing repeat regressions in subsequent releases.
- Basic Knowledge on Cyber Security, Virtualization, Storage, Automation

SELF-MADE PROJECTS:

Admin Dashboard (Frontend) | React.js, Chart.js, Material-UI | [GitHub](#)

- Built a **real-time analytics dashboard** from scratch using React.js, featuring interactive charts (Chart.js) and dynamic data grids for visualizing user activity and sales metrics.
- Designed reusable **custom UI components** (tables, modals) with Material-UI, achieving **95% design-system consistency** across the platform

The Portfolio Collection | Frontend Showcase | JavaScript, React.js, Node.js | [GitHub](#)

- Developed a curated collection of 4 web applications focusing on **API integration, state management**, and responsive design.
- Featured projects include a Movie app and Ecommerce app, demonstrating versatility across different frontend frameworks.

CERTIFICATION, ACHIEVEMENTS AND STRENGTHS:

CERTIFICATES

- HackerRank Python (Basic) | 2021
- Meta Front-End Developer Professional Certificate | Coursera
